It was isolated by affinity purification and thrombin cleavage. HCAVIII is a cell surface antigen which is highly specific for non-small cell lung cancer, and which shares regions of homology with human carbonic anhydrases. It can be used to produce antibodies of therapeutic or diagnostic application.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Claim 7; Page 44-46; 87pp; English.

                                          A cDNA sequence (AAT15454) codes for a phosphorylation-modified form (AAR91955) of HCAVIII, a cell surface antigen which is highly specific for non-small cell lung carcinoma (NSCLO) and which has features in common with human carbonic anhydrases. The modified HCAVIII has glycine substituted for serine at position 302 of the mature protein. It is used to study the role of HCAVIII serine
                                                                                                                                                   Claim 16; Page 59-60; 87pp; English.

    Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Score

                                                                                                                                                                                                                                                                                                                                                                                                                                                               05-JUN-1985
                                                                                                                                                                                                  The claimed peptide antagonists inhibit the release of gonadotrophins and/or steroids. They are antagonistic to GnRH, inhibit ovulation, and may cause resorption of a fertilised egg if administered shortly after absorption. The peptides also have utility in male contraception, and in treatment of precoscious puberty, hormone dependent neoplasia, dysmenorrhoea and endometriosis.
                                                                                                                                                                                                                                                                                                      New GnRH antagonist peptide(s) - useful as inhibitors of gonadotropin(s) and/or steroid(s) for contraceptive use.
